

Your Partner in Energy Conservation Efficiency

Steam Management, Inc. (SMI) works with you to improve building efficiency, decrease utility costs and energy losses with turnkey insulation services. We provide our partners a single point of contact and competitive pricing for an entire ECM including Pipe Insulation and Removable Insulation Covers (RICs).

Commonly, we find that piping and equipment are inadequately insulated, missing insulation, or have insulation that is degraded. These conditions all result in exposed piping and equipment in excess of 180 degrees Fahrenheit, causing safety concerns and increased operation and energy costs.

To maintain the efficiency of the heating and cooling systems, SMI will measure, design, and install conventional insulation and RICs throughout a facility or campus. Our solutions improve safety and save energy throughout the facility.

Process

We customize our approach and the process based on your needs and goals.
